

Add fast, cost-effective G.729a transcoding to your soft-switch now!

- Supports the Asterisk® and FreeSWITCH soft-switches
- Double the capacity of other solutions at half the price!
- Floating licenses for multi-server deployments

Features

- Optimised G.729a codec transcodes more than 500 concurrent calls on a single server*
- Scalable Low Bit-Rate transcoding on inexpensive commodity Intel® and AMD® hardware
- Supports popular open source soft-switches including Asterisk® and FreeSWITCH
- Up to 50% more performant than existing G.729a solutions for Asterisk and FreeSWITCH
- The lowest price-per-channel in the industry for fully indemnified G.729a
- The first fully interoperable and indemnified G.729a solution for FreeSWITCH
- Flexible licensing options including floating licenses for multi-server deployments

Attract new business

Allow your business to transcode audio to and from G.729a. Many business-class IP telephones and VoIP gateways include support for G.729a. With our G.729a Howlet, your Asterisk and FreeSWITCH servers can now process G.729a calls more cost-effectively than ever before.

Increase your revenue

Adding transcoding capability to your network allows you to take on VoIP traffic from sources you previously could not. Our Howlet performance, pricing and flexible licensing means we can offer you the best possible price/performance codec product in the market.

230+ channels per processor

Our optimised Howlets offer over 230 channels of transcoding capability on Asterisk and FreeSWITCH. This is 50% higher than the nearest competitor and 100% higher than libg729.

'Float' licenses across servers

Our flexible licensing policy allows you to float your G.729a Howlet license across multiple servers, not being fixed to one machine*. This allows you to offer transcoding capability across your entire infrastructure.

Increase voice traffic

Because our G.729 Howlet is more performant than its competitors, you get more calls processed on the same hardware. This results in more traffic across your network.

G.729a royalties included

Our licenses include all sub-licensing from the codec patent owners. We manage all royalty payments to the patent holders and free you from this obligation. We're pleased to offer the most economical per-channel price in the

Flexible Licensing Options

- This 'Howlet' is licensed per concurrent channel and both fixed-server and floating licenses are available
- Channel licenses can be added to your servers using a licence key, and are available for use immediately
- Buy exactly the number of channels (encoder+decoder) you need, when you need them!

Floating Annual License

£3.99
per channel

- Deploy 'Howlets' across multiple servers
- Licensed channels 'float' dynamically across the servers
- Each server can use the licensed channels, as long as in aggregate the total number of channels is not exceeded
- Recurring annual fee for the licence includes all royalties, upgrades and support fees

Fixed Perpetual License

£5.99
per channel

- Deploy 'Howlets' to individual servers
- Licensed channels are bound to a server
- One-off fee for the licence
- One-off fee includes royalties and bug fixes
